As part of their Autodesk applications, Autodesk, Inc. also allows downloading and installing the Acutoolbar and Acutoolbar Multi-Toolbar software applications. Trademarks AutoCAD includes the design and build tools used by civil and architectural engineers and construction industry professionals. The name AutoCAD was conceived in 1985 by John Warnock, creator of Virtual Reality Research (VRR). Warnock included the trademark "AUTOCAD" in a letter to his friends, who referred to the trademark as "AutoCAD." The name was later trademarked as AutoCAD® and is now a registered trademark of Autodesk, Inc. and the company claims it is the first design tool used by engineers and designers. The trademarked name was initially used on the products of VRR, then later licensed to Autodesk. However, the name was not used on any version of AutoCAD until 1992. In June 2003, Autodesk purchased the rights to the name and trademarked it as Autodesk® AutoCAD®. Autodesk had previously licensed the name to VRR, and it used the name in its Dimension product line and Autocad RealTime product. However, VRR is no longer a division of Autodesk. On August 29, 2018, Autodesk updated their logo and website to add the AutoCAD trademark to the logo. As of October 2019, Autodesk states that it has about 800 patents for its technology, and approximately 1,300 other patents pending. Logos The first logo was the Autocad logo used from 1987 to 1997, showing a depiction of the software itself. The copyright symbol and the Autocad logo remained on top of a CAD drawing in 1997. On August 29, 2018, Autodesk announced its new AutoCAD logo, which includes the trademark in the logo. Autodesk also introduced a new logo for its Autodesk® AutoCAD® software. Product releases AutoCAD traditionally releases new versions of its product every two years. However, as the market place grows, Autodesk has found it necessary to release more frequent updates. Since AutoCAD 2014, Autodesk has released two 5b5f913d15
